EXCITED ABOUT

- Learning new technologies.
- A fun work environment.
- Working with people smarter than me.
- Performance optimization, troubleshooting and debugging.

CLIENT MGT

Much of my 10-year career has been spent in a client-facing role - managing expectations, translating requirements, educating, invoicing, and proposal writing.

PROJECT MGT

Have experience with:

- Jira, GUS, Asana, Trello
- Gantt Charts
- Confluence
- Agile Development

CLIENT SIDE

- ReactJS, JavaScript, ES6, jQuery
- HTML5
- CSS3, SASS
- Bootstrap 5, Foundation, TailwindCSS
- Gulp, Grunt, Compass, Webpack 3, Parcel, NPM, Yarn, Lint
- YML, Twig, Mustache

SOFTWARE DEVELOPMENT EXPERIENCE

Software Engineer - Salesforce Seattle, WA — 10/2021 - Present

www.salesforce.com

Part of the Marketing Engineering team at Tableau that's responsible for building, maintaining and supporting several of Tableau's marketing sites. Notably, www.tableau.com, which is currently running on Drupal 10.

Key Contributions

- Overcoming challenges with custom solutions written primarily in PHP, JavaScript, CSS, HTML, MySQL and YML; taking a project/assignment from discovery to design, UX refinement, development, testing, documentation, deployment and post-release monitoring, with stakeholder and cross-team communications across 3 US time zones.
- Maintaining regular updates/upgrades for Drupal core and modules to ensure site security and reliability.
- Hosting weekly team Demos, and conducting Pull Request reviews on teammates' work as part of our Software Quality Assurance policy. Also, helping to improve team processes (Standups, Operations Reviews, bi-weekly Backlog Grooming, Retrospectives and Sprint Planning).
- Lead Engineer for a project automating the daily extraction of user-submitted 'Blueprint Assessment' data from a Dockerized MariaDB image inside a GitHub Actions workflow, exporting to CSVs, authenticating with AWS via configured IAM policies, then uploading to S3. This data is then transformed and consumed by the Tableau Decision Science team based in India for actionable insights on how new/prospective users are intending to use Tableau software.
- Rebuilt authentication forms used for gating Product Download pages on tableau.com, enhancing User Experience. Also implemented a global kill switch that allows for easy toggling of the gating feature via the Drupal UI, and ensuring performance with unit tests.

Senior Dev. - MethodistCRM Accra, Ghana — 10/2019 - 10/2021

laudtetteh.io/methodistcrm.html

- Built a CRM dashboard, with authentication, for community-based church programs, powered by Laravel & MySQL.
- Features include reports & dynamic search, notifications, analytics, messaging, an events calendar, branch locator, store, cart & checkout system.

SERVER SIDE

- PHP, Composer, Homebrew
- Laravel, WordPress, Drupal
- Strapi, CraftCMS
- MySQL/MongoDB
- GraphQL
- RESTful APIs

Exposed to but not proficient in...

- TypeScript
- Node.js
- Express
- PostgreSQL
- Python

DEV OPS

- Git
- GitHub Actions, CircleCI
- Docker, Vagrant
- Linux, Bash
- AWS (S3)
- Heroku, Netlify, Pantheon
- Cypress, Unit & Existing Site Testing

MONITORING

- New Relic

ANALYTICS

- Google Analytics
- Adobe DTM
- Segment

DESIGN

Limited experience with...

- Figma, Sketch, Photoshop

EXPERIENCE, CONTINUED

Senior Dev. - Studio Ten Four, LLC Seattle, WA — 10/2014 - Present

www.studiotenfour.com

Established a reputation as a forward-thinking developer by continuously refining expertise in PHP, Javascript, CSS, and HTML while building client websites.

Notable Clients & Projects

- WordPress Development & Support | King County 4Culture www.4culture.org. Webmaster and custom plugin development for this Washington State non-profit.
- Drupal Support | University of Hawai'i William S. Richardson School of Law www.law.hawaii.edu. Key features include class/course database, personnel directory, events calendar, student classifieds, job listings, archive of past exams, and password protected content for @hawaii.edu students.
- Data Migration | University of Hawai'i William S. Richardson School of Law www.law.hawaii.edu. We also led a data migration project from Drupal to WordPress when the site was rebuilt. This involved writing scripts to configure and automate the transformation/sanitization of tables from the Drupal database for the WordPress schema.
- Accessibility Consultant & WordPress Development | South Seminole and North Orange County Wastewater Transmission Authority ssnocwta.com. This was a redesign & rebuild that focused on WCAG 2.2 accessibility compliance.

Front-End Engineer - Moz Seattle, WA — 7/2016 - 1/2017

www.moz.com

Brought on for a 7-month contract, during which I worked with the Inbound Engineering team to migrate portions of moz.com from CakePHP to Craft CMS.

- Worked with the UX team to translate comps into marketing pages.
- Worked with the Business Intelligence department to implement Page Load and Event tracking using Adobe DTM and Segment.
